Tablet.

Acrylic mirror.

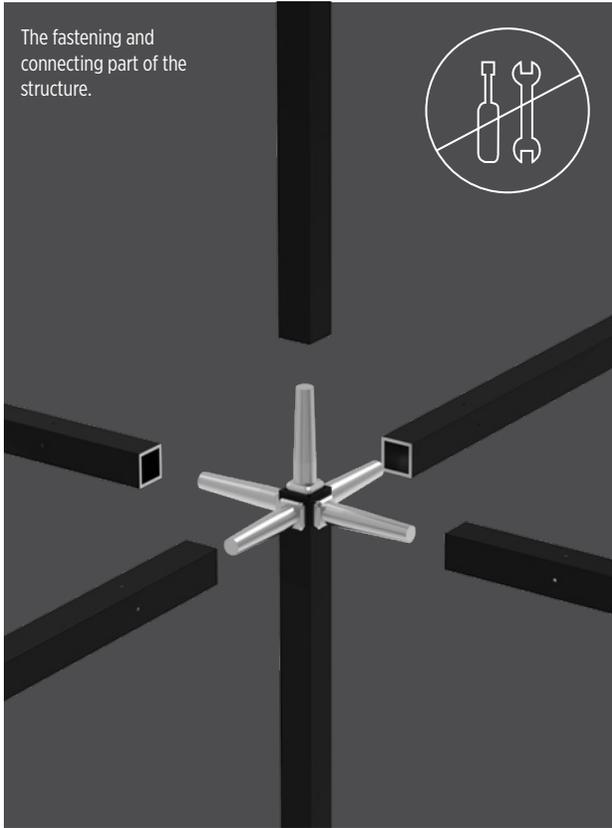

MOSAIC BESPOKE

Custom Mosaic displays tailored to your needs.

MOSAIC BESPOKE

The fastening and connecting part of the structure.

Alongside our standard MOS1 and MOS2 Mosaic displays, we provide customized Mosaic displays designed specifically to suit your requirements.

Mosaic display construction utilizes aluminium rods that interlock seamlessly (patented), allowing for effortless assembly of structures in diverse sizes and shapes, all without the need for additional tools.

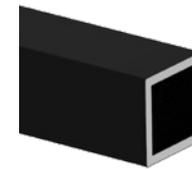

Furthermore, our constructions feature integrated LED lighting, cordlessly powered, ensuring a clean aesthetic without visible cables.

Our panels, available in acrylic or LED canvas, are precisely cut to fit within the predefined structures. Additionally, our acrylic shelves offer a variety of decorative options.

Contact us to explore a fully tailored solution to your display needs.

CONSTRUCTION

15 mm thick aluminum rods are available in standard aluminum, black, and white. Other finishes are available upon request.

PANEL

Acrylic - matte white.
Other finishes available upon request.

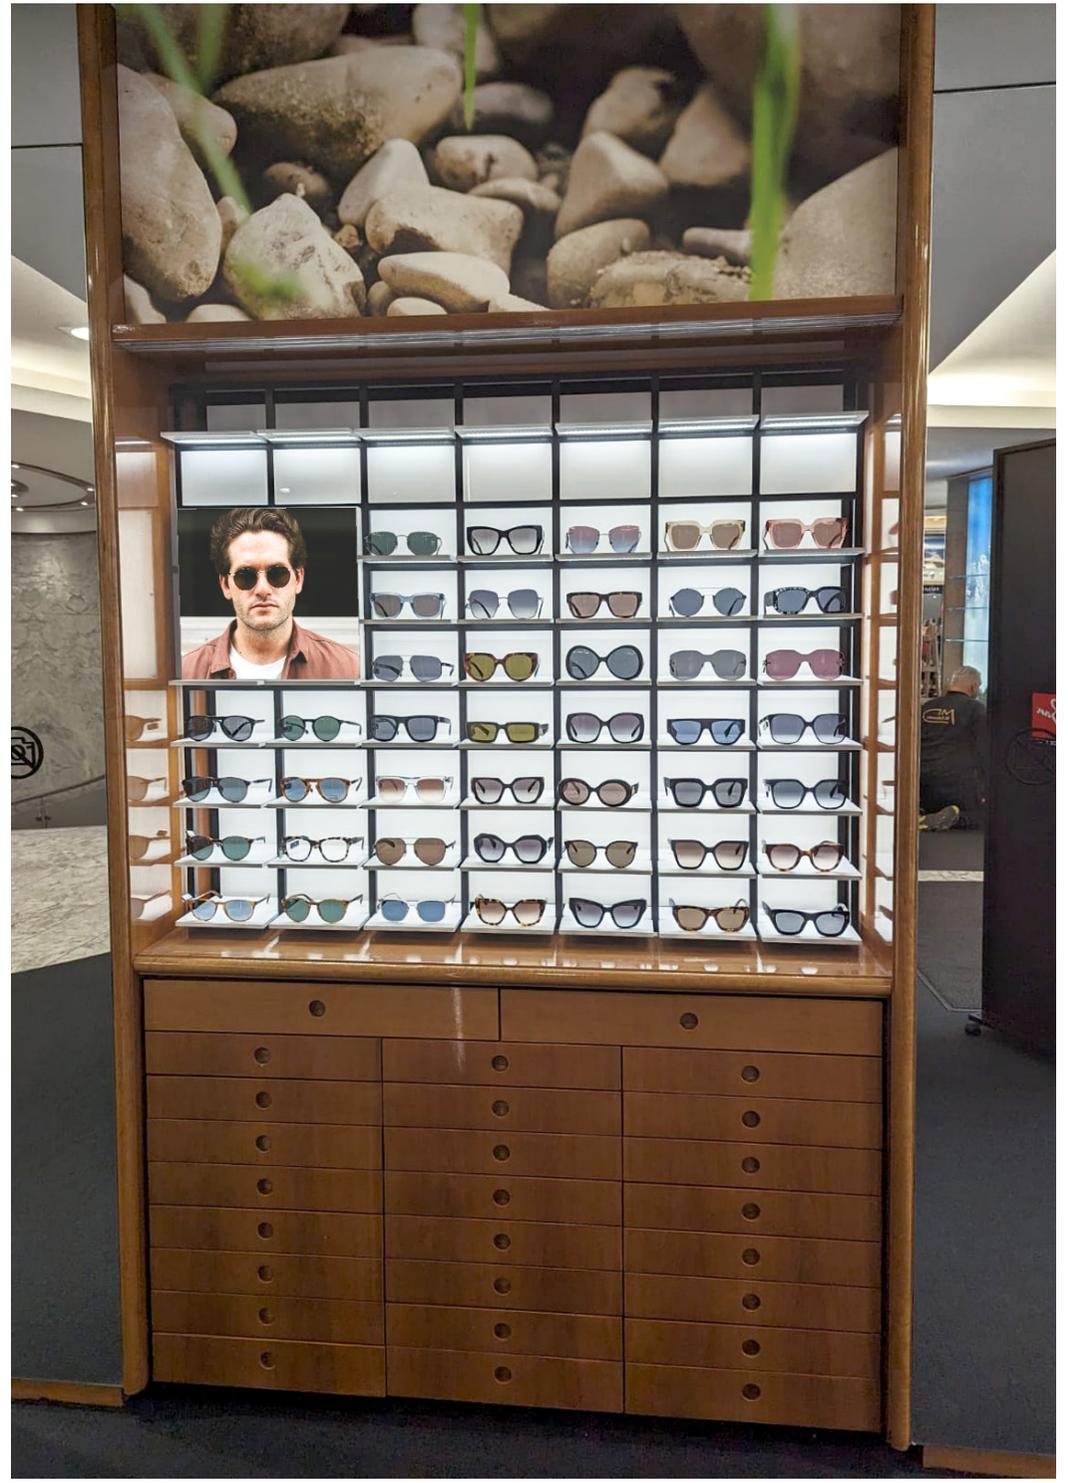

LED canvas
